

AI Vets for Chilled & Frozen Semen

The following vets and veterinary practices are those with whom we have dealt successfully for frozen and/or chilled semen. Please note that the list is not exhaustive and will be updated regularly – if you do not see your own veterinary practice listed, we recommend you satisfy yourself that they are experienced in the following:

- Preparation of mare for chilled or frozen semen AI
- Handling of chilled or frozen equine semen prior to insemination
- Equine insemination techniques for chilled or frozen semen

Also, in the case of frozen equine semen, please ensure that your vet has adequate storage facilities and access to liquid nitrogen supplies.

Many veterinary practices offer fixed price Stud Packages covering all routine gynaecological work, inseminations and pregnancy scans, so it is worth asking when making enquiries about their services and fees.
