

## **BASIC CHARGES FOR STALLIONS VISITING THE CENTRE IN 2011**

### **1. COST OF A DAY VISIT TO EVALUATE A STALLION'S SEMEN FOR FREEZING**

Two semen collections, freezing and post-thaw evaluation of each sample and preparation of a report **£ 290.00**

Additional charge for each dose of frozen semen produced from the two collections **£ 9.00**

### **2. CHARGES FOR STALLIONS IN RESIDENCE AT THE CENTRE**

Full livery at the centre **£ 30.00/day**

To include maintaining a stallion in quarantine conditions for semen export (if required) and exercising him to his owner's requirements.

Collecting and freezing one ejaculate (To include the first 5 doses processed) **£ 145.00**

Charge for each additional dose of useable semen produced from an ejaculate **£ 9.00**

(During a short stay, it may be possible to make 3 to 4 collections from a stallion in 2 or 3 days. Over a longer period, the most cost-effective routine is to make no more than 3 to 4 collections per week.)

### **3. HEALTH CHECKS**

The cost of collecting and testing blood, semen samples or swabs that may be required will be charged as extras.

These costs depend on regulations laid down by importing countries. Prices range from less than £230 to meet basic EU health requirements to more than £800 to cover the current requirements for export of semen to all the major markets.

A guide to the export health requirements and the likely costs involved in having semen collected and frozen for various overseas markets is attached to this sheet.

*All prices are subject to VAT at the prevailing rate*
